Metafile Information Systems Joins Volaris Group, part of Constellation Software, Inc.

Rochester, Minn., August 2, 2021 – Metafile Information Systems, the company behind MetaViewer Paperless Automation and ResultsPlus Nonprofit CRM, announced today that it has joined the Volaris Group, a subsidiary of Constellation Software, Inc., based in Toronto, Ontario.

Metafile will continue to operate as an independent business unit and provide the same great services and solutions to its customers just as they have done for more than 40 years. Additionally, they will continue to serve customers with the same leadership team and trusted employees and will maintain their company mission of strong client satisfaction, quality work and providing innovative solutions.

“Our organization chose to become part of Volaris because we believe it is a perfect fit for Metafile,” said Metafile Information Systems CEO, Nick Sprau. “The change will benefit our customers and employees and brings us a multitude of opportunities simply not available on our own. These opportunities include access to capital, talent and operational expertise, and a synergy with other similarly situated companies.”

Volaris specializes in software technology and is committed to building world-class solutions focused in a variety of subject domains. The relationship between Volaris and Metafile will enable Metafile to further strengthen their technology offerings in both the nonprofit and ePayables industries in the coming years.

“We look forward to continuing to be the responsive, trusted and skilled partner you have always relied on,” Sprau said.

For more information on the transition, please contact your sales representative or reach out to info@metafile.com.
